The recovery of the global economy is not on the expected levels. Though there has been a marked improvement, the same is not sufficient. The market is witnessing many ups and downs. It is imperative that a constant watch alone will ensure better performance. Your company has taken every steps and is on the vigil to identify areas where corrective steps should be taken in time.

By the adoption of certain strategy to improve export market, constant upgradation of quality and efficient production facilities, your company has been able to perform better.

The Board of Directors are pleased to inform the shareholders that the establishment of the production facilities to manufacture "Open End Spinning Yarn" has been implemented and commercial production has commenced in the month of March 2012.

The power front has been a major setback not only to the industry but also the entire state. This has increased the cost of production due to internal generation through Genset and third party power purchases at a higher cost. As a consequence the profitability was affected.

Except for the unforeseen circumstances, the impact of the expansion and diversification will be fully reflected in the financial year 2012-2013.
